About this document

This document contains random formulae images I used in the notes.

$$A = \{1, 2\}$$
  
 $B = \{1, 2, 3\}$ 

$$E[X^{2}] = \int_{0}^{1} x^{2} dx$$

$$= \frac{x^{3}}{3} \Big|_{0}^{1} = \frac{1}{3}$$
(2)

$$= \frac{x^3}{3} \Big|_0^1 = \frac{1}{3} \tag{2}$$

$$\frac{|x-\mu|}{k\sigma}>1$$

Over the set  $\{x : |x - \mu| > k\sigma\}$ 

$$\frac{(x-\mu)^2}{k^2\sigma^2} > 1$$

$$\frac{1}{k^2\sigma^2} \int_{-\infty}^{\infty} (x-\mu)^2 f(x) dx$$

$$\frac{1}{k^2\sigma^2} E[(X-\mu)^2] = \frac{1}{k^2\sigma^2} Var(X)$$

$$P(A_1 \cup A_2 \cup A_3) = P\{A_1 \cup (A_2 \cup A_3)\} = P(A_1) + P(A_2 \cup A_3)$$
$$P(A_1) + P(A_2 \cup A_3) = P(A_1) + P(A_2) + P(A_3)$$

Brian Caffo

$$P(\cup_{i=1}^n E_i) = P\left\{E_n \cup \left(\cup_{i=1}^{n-1} E_i\right)\right\}$$

$$(x_{1}, x_{2}, x_{3}, x_{4}) = (1, 0, 1, 1)$$

$$p^{(1+0+1+1)}(1-p)^{\{4-(1+0+1+1)\}} = p^{3}(1-p)^{1}$$

$$SD(X)SD(Y)$$

$$Var(X)$$

$$Var(X) = E[X^{2}] - E[X]^{2} \rightarrow E[X^{2}] = Var(X) + E[X]^{2} = \sigma^{2} + \mu^{2}$$

$$Var(\bar{X}) = E[\bar{X}^{2}] - E[\bar{X}]^{2} \rightarrow E[\bar{X}^{2}] = Var(\bar{X}) + E[\bar{X}]^{2} = \sigma^{2}/n + \mu^{2}$$

$$f(x|y=5) = \frac{f_{xy}(x,5)}{f_{y}(5)}$$
